info@ensia.org.tr

ENSIA becomes the address for the vision of clustering that Turkey needs in **RENEWABLE ENERGY** industry...

Alongside the main industrial companies in the **RENEWABLE ENERGY** sector, sub-industry equipment producing companies are being gathered within ENSIA...

We are aware that having **DOMESTIC ENERGY** is not enough by itself. We believe that the equipment that we produce energy should also be produced by local companies in our country. We strive to promote domestic production, increasing and developing awareness...

We consider the companies producing **EQUIPMENT AND COMPONENTS** as a link in the value-added chain of the renewable energy industry.

ENSIA | ENERGY
INDUSTRIALISTS
& BUSINESSMEN
ASSOCIATION

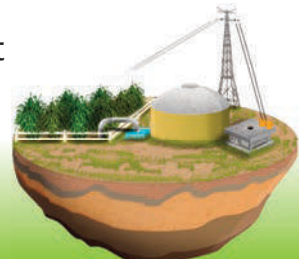

We endeavor to reduce our country's dependence on foreign sources and energy imports by focusing on clean energy, as well as ensuring the diversity in energy sources...

OUR VISION

To advance **TURKEY** to an international base that produces equipment, technology, and projects in the field of **RENEWABLE ENERGY AND ENERGY EFFICIENCY...**

OUR MISSION

To ensure the formation, development, and growth of the main and sub-industry of the **RENEWABLE ENERGY** industry while considering the 'Right for Cheap and Clean Energy', as well as to contribute to the formation and development of new technologies which are not available in Turkey...

WHO CAN BE A MEMBER?

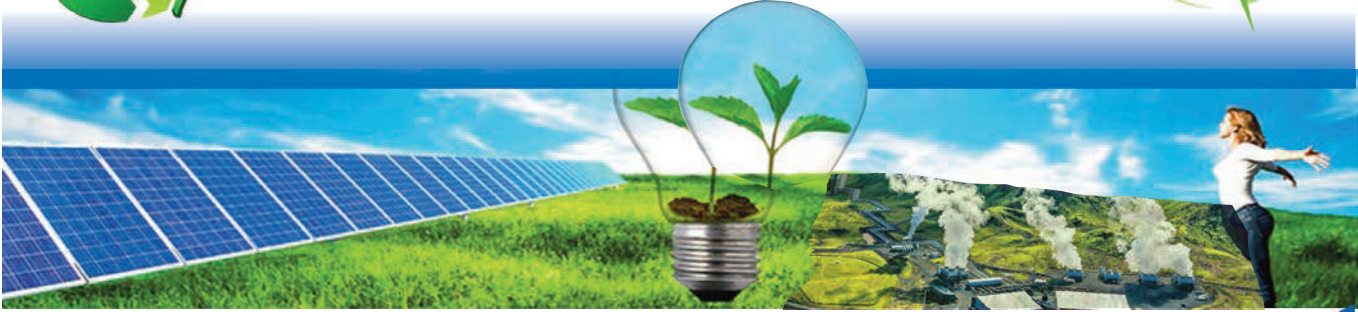

Companies operating in the following sectors:

-  Wind Energy Companies
-  Solar Energy Companies
-  Geothermal Energy Companies
-  Energy Efficiency & Consulting Companies
-  Energy Storage, Transmission & Distribution Systems Companies
-  Renewable Energy Project / Contracting / Service / Maintenance Companies
