## ENSIA ACADEMY

ENSIA Academy brings together the technical training demands of our Corporate Members, especially the ISO 50001 Energy Management System, with the vision and experience of competent trainers.

We aim to make ENSIA Academy, to which our Academic Members also contribute, to be the address of technical education in the Renewable and Clean Energy sector.

## WHO CAN BE MEMBER?

- Wind Energy Industrialists
- Solar Energy Industrialists
- Geothermal Energy Industrialists
- Biomass Energy Industrialists
- Hydrogen Energy Industrialists
- Wave / Flow Energy Industrialists
- Energy Efficiency & Consultancy Companies
- Renewable Energy / Subscription / Service / Maintenance Companies
- Energy Storage / Transmission / Distribution / Storage Systems Companies
- Finance Institutions Working in the Field of Clean Energy Sector

# ENSİA

ENERGY  
INDUSTRIALISTS  
& BUSINESS  
ASSOCIATION

We see our companies that produce equipment and components as a link in the added value chain of the renewable energy sector.

By focusing on clean energy, we are working to ensure the diversity of our country's energy resources, to reduce foreign dependency and energy imports...

We are working to increase the international competitiveness of companies working in the field of clean energy and clean technologies, and to ensure the integration of the clean energy value chain into the supply system.

ENSİA is becoming the address of the clustering vision that Turkey needs in the renewable energy sector.

In addition to the main industrial companies in the renewable energy sector, companies producing equipment as sub-industry are gathered under ENSİA.

We know that our domestic energy is not enough on its own. We believe that the equipment we produce energy should be produced by companies located in our country. We are working to encourage this production, increase its awareness and develop it..

## OUR VISION

Our vision is to increase the competitiveness of clean energy and clean technology companies and ensure their integration into the international supply chain.

## OUR MISSION

Our mission is to carry out innovative projects, together with national and international stakeholders, to increase the competitiveness of our members and to develop the clean energy and clean technology value chain in our country.
